**Re: 2005 Water Quality Initiative**

Ms. Evans,

It is my pleasure to submit the final reports of the 2005 Muskoka Lakes Association water quality initiative (submitted under the name of Lura Consulting). Reporting on this fifth year of the initiative is in three complimentary parts. The first is a short summary of the monitoring function of the program that should be of interest to most readers. Its distribution should therefore be encouraged widely. The second part of the reporting structure is the newly posted interactive website designed by the Centre for Community Mapping, found on the Internet at <http://www.mla.on.ca>. This application provides an interface for accessing all monitoring data collected throughout the program's history. The third part is the traditional technical report (also enclosed), which will be of interest to advanced readers.

This year's reports build on the four previous years' work. We recommend a continuation of the initiative in 2006 with a few subtle changes as noted.

The interest and volunteerism that the MLA has generated through this initiative demonstrates its importance. I would like to thank the Association for the opportunity to work with you on this project, and look forward to working with you in the future.

Yours truly,  
Logan Environmental Consulting
